PROFESSIONAL SUMMARY

Cybersecurity enthusiast pursuing a Bachelor of Computer Applications (IGNOU) and holding a Diploma in Cyber Security. Hands-on exposure to SIEM (Splunk), Linux, networking, log analysis, alert triage and basic incident response through projects and labs. Strong foundation in TCP/IP, DNS, HTTP/HTTPS and security monitoring with a passion for SOC operations.

EXPERIENCE

Cyber Security Intern – Unified Mentor (Internship)

- Worked with Linux systems and security monitoring concepts.
- Performed basic log analysis and investigated suspicious authentication events.
- Used networking and security tools during practical labs.
- Supported vulnerability assessment and documentation activities.

PROJECTS

Linux Log Analysis & SSH Brute Force Detection

- Analyzed authentication logs to identify suspicious login attempts and documented findings.

Nmap Network Scanning & Risk Analysis

- Performed reconnaissance, service enumeration and basic risk assessment.

Deloitte Australia Cyber Job Simulation (Forage)

- Completed practical cybersecurity simulation focused on log analysis and risk analysis.

TECHNICAL SKILLS

SIEM (Splunk) • Linux • Windows • Networking • TCP/IP • DNS • HTTP/HTTPS • Nmap • Wireshark • Burp Suite • Hydra • Python (Basics) • Threat Analysis • Incident Response • Log Analysis

CERTIFICATIONS

- Certified Ethical Hacker (CEH)
- Linux Essentials
- Deloitte Australia Cyber Job Simulation (Forage)

EDUCATION

Bachelor of Computer Applications – IGNOU (Pursuing)

Diploma in Cyber Security

Senior Secondary (PSEB)
